

# Harness the Power of Telehealth

## Sophrona Telehealth at a Glance

### Scheduling

Schedule Telehealth visits easily for doctors and patients, while operating remote or with a smaller onsite team.

### User-Friendly Video Visits

Operate user friendly Video Visits where the patient receives a link to check-in from their device and the doctor is notified to join.

### Workflow Details

Run daily reports on chief complaints, who the Video Visits are for, and how to bill for each type of visit.

### Secure Messaging

Setup secure messaging to accept e-visits. Based on communication, the provider decides whether the e-visit can be billed.

### Retention Waitlist

Build a waitlist to make scheduling easier. Patients who can't reach you can easily add themselves for subsequent follow up.

Schedule a call with our team to learn more about how we can help your practice implement Telehealth today.

## Connecting the Dots.

Expand your patient reach, at anytime, from any place.

Sophrona can support your practice in the short term while preparing for the long term. Our Telehealth solution can help you solve the challenge of taking care of your patients without seeing them in the office. Sophrona can help your practice connect the dots between how to implement e-visits and Video Visits, and schedule efficiently. Telehealth provides an opportunity to deliver care, even with a reduced staff, without requiring patients to come onsite in the future.
