GROW YOUR
REFERRALS
with ModMed® and Sophrona

Are you ready to create a more successful co-management network?

Sophrona's **Referral Portal** makes it easy to schedule and track referred patients, and increase communication with your referring doctors.

WHY USE THE REFERRAL PORTAL?

Every referral counts. Still, patient referrals slipping through the cracks is one of the most common challenges medical practices face today. **Can you relate?**

Sophrona offers the best Referral Portal for Modernizing Medicine® clients. Our partnership helps medical practices simplify and automate the referral process by making it easy to refer.

SCHEDULE
Referral Portal makes it easy for referring doctors to schedule an appointment before the patient leaves their offices.

TRACK EVERY REFERRAL
Whether it is sent by fax or through online scheduling, get the visibility you need to see every referral, and where they are in the process.

COMMUNICATE
Real-time status updates between doctors with final outcome sent to the referring doctor to close the feedback loop.

SEE WHO IS REFERRING
Increased visibility inside the Referral Portal allows you to see which doctors are actively referring and who is not.

> " The Referral Portal lets referring doctors go into the system and send a patient directly. Once they've done that, they can look at what's going on with their patients, ask questions, and have resources to follow up with that patient.
