

170.315 (b)(10) Electronic Health Information Export

Export Information

- Single patient export is available within Sophrona Patient Portal under “Health Information”.
 - Patients have direct access to their medical records in C-CDA, PDF or both formats.
 - Practice staff may contact Sophrona support for specific instructions.
- Population or bulk export can be accommodated depending upon the practice integration as Sophrona supports multiple methods. Please contact customer support to confirm your method of integration.
 - “Direct” FHIR Integration – Support for the bulk FHIR standard referenced here ([FHIR Bulk Data Access - hl7.org](#)) with additional support per the Sophrona API documentation referenced below.
 - Document Reference – Available from within specific Sophrona products per the Resource DocumentReference specification referenced here ([FHIR DocumentReference - hl7.org](#))
 - “Relied-Upon” Software – Please contact customer support for further instructions.
